Australia's Conservation Choices

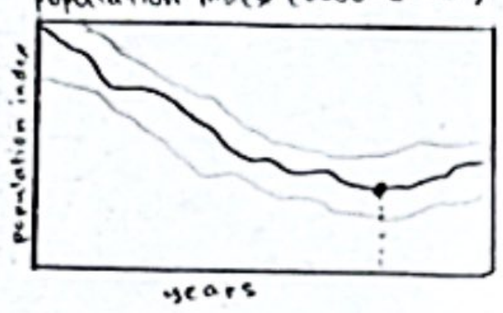

Exploring threatened wildlife, conservation priorities, and where funding goes.

Introduction

Australia's Monitored Threatened Populations Have Fallen By More Than Half.

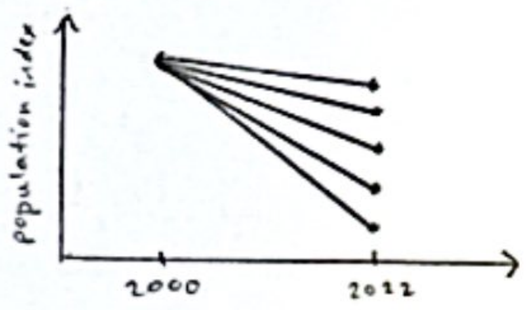

How much have populations declined?

National threatened population index (2000-2022)

Which groups suffered?

Population index change by group (2000-2022)

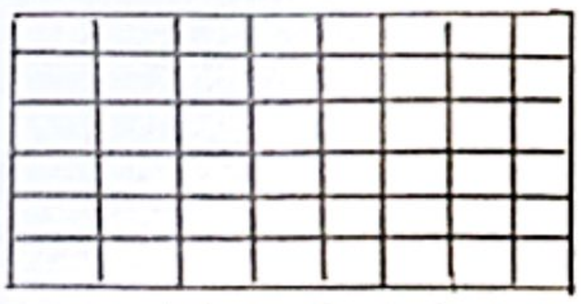

Priorities Have Changed Significantly.

How were conservation priorities chosen?

Priority entries by species group and list

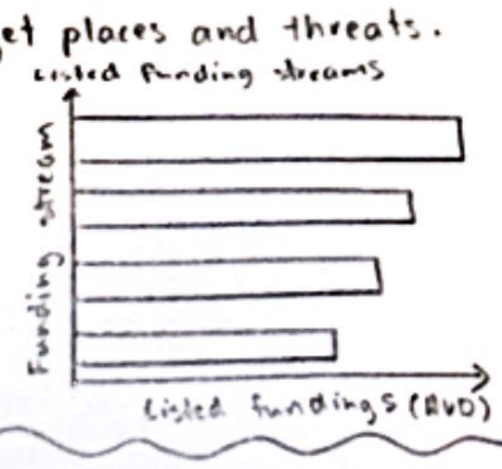

Only 27 priorities remained

changes between 2 priority lists

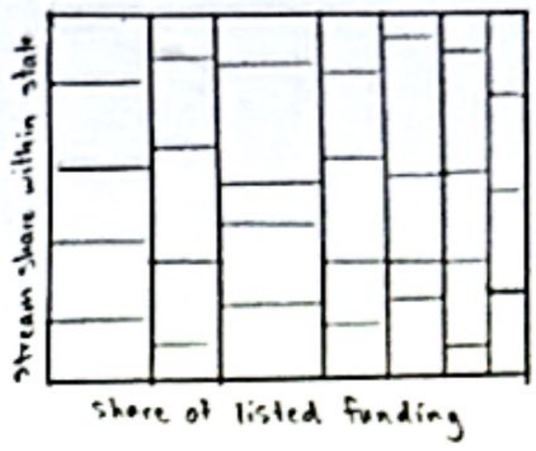

Where is Conservation Funds Going?

Most listed fundings target places and threats.

next page ↗

Funding shares by state and purpose.

Where are projects concentrated?

Priority species funding by state.

Single state project entries by state

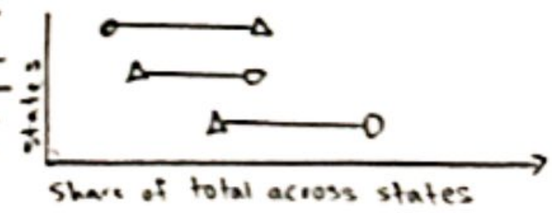

Mapped project allocations across Australia

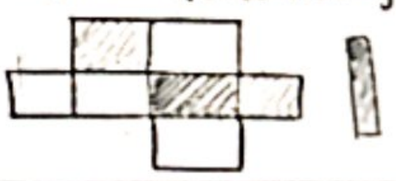

Are States With More Threathened Species Receiving More Funding?

state shares of threatened species and funding.

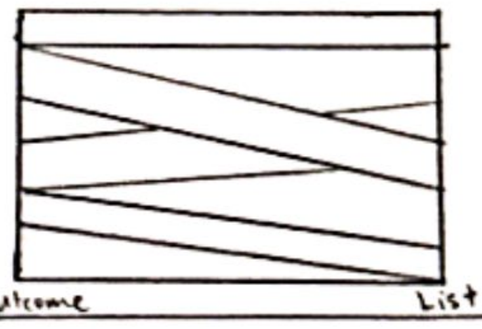

Does the type of species matter?

Threatend species listing.

Have Conservation Projects Shown Signs of Recovery?

Outcomes and priority status

conclusion
